Education

University Tecnológica Nacional (UTN)

Information Systems Engineering

Córdoba, Argentina

March 2023 – Present

Experiencie

Engine e-commerce

Remote

Full-Stack Developer

June 2024 – June 2025

- **Stack:** Python, Django, DRF, PostgreSQL, Redis, Docker, Nginx, JavaScript, Pytest.
- **Developed** an e-commerce engine with a Modular Monolith architecture in Django, optimizing catalog loading via bulk inventory processing (CSV) in seconds.
- **Implemented** containerized infrastructure with Docker Compose, configuring Nginx as a Reverse Proxy for efficient static/media delivery and Gunicorn as the WSGI server.
- **Optimized** response times using caching strategies in Redis (AOF persistence) and eliminating N+1 queries through Django ORM optimizations (select_related/prefetch_related).
- **Integrated** payment gateway with Mercado Pago API, enabling real-time order status updates via webhooks.
- **Configured** Full-Text Search in PostgreSQL for products and automated database backups using Bash scripts.
- **Developed** a Mobile-First interface (UI/UX), combining SSR for SEO with JS for frontend interactivity.

Package delivery system

Córdoba, Argentina

Backend Developer

July 2025 – December 2025

- **Stack:** Java 17, Spring Boot, Spring Cloud, React, Docker, PostgreSQL, JUnit 5, OAuth 2.0, JWT.
- **Developed** 6 Microservices: (Routes MS) orchestrates shipment creation, validates packages (Packages MS) and vehicles (Fleet MS), calculates distances (Geocoding MS), and persists data in an atomic transaction.
- **Implemented** a single entry point and centralized security with Spring Cloud Gateway, validating JWTs and forwarding requests, while Auth MS (Keycloak) handles token issuance and refresh.
- **Integrated** external routing API (OSRM) to calculate and optimize routes in real time.
- **Configured** unit and integration tests across all microservices, covering happy paths, business rules, and error handling.
- **Containerized** and orchestrated all 6 microservices using Docker Compose.
- Repository: <https://github.com/LucasCallamullo/fleet-optimizer>

Skills

- **Languages:** Java 17, Python
- **Backend:** Spring Boot, Spring Cloud, Django, Django REST Framework (DRF).
- **Infraestructure & DevOps:** Docker, Docker Compose, Nginx, Bash Scripting, CI/CD (GitHub Actions)
- **Databases (SQL/NoSQL):** PostgreSQL, SQLite, Redis.
- **Frontend:** React, JavaScript, HTML, CSS.
- **Testing & Tools:** JUnit 5, Mockito, Pytest, Postman, Swagger, Git, GitHub.

Languages

- English (B2)
